

# Carbon Reduction Plan

Supplier name: **Oaklin**

Publication date: **30/09/2022**

## Commitment to achieving Net Zero

Oaklin is committed to achieving Net Zero emissions by 2030.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 1st April 2019 – 31st March 2020</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
Our carbon emissions are calculated using average data approached as described in the GHG Protocol and input from carbonfootprint.com.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>Nil</b> (Oaklin do not produce any emissions directly)
<i>Fuel Combustion</i>	-
<i>Vehicle Fleet</i>	-
<b>Scope 2</b>	<b>78</b>
<i>Purchased Electricity</i>	78
<i>Steam, Heating and Cooling</i>	Building heating emissions covered above in Purchased Electricity.

<b>Scope 3 (Included Sources)</b>	<b>274.58</b>
<i>Purchased Goods and Services</i>	Not material
<i>Capital Goods</i>	Not relevant – Oaklin do not have any capital goods.
<i>Fuel and Energy Related Activities</i>	Not relevant – Oaklin fuel and energy is covered in Scope 2
<i>Transportation and Distribution of Products (Upstream and Downstream)</i>	Not relevant – Oaklin do not produce, sell or transport any products.
<i>Waste Generated in Operation</i>	Not material
<i>Business Travel</i>	255.31
Employee Commuting	19.27
<i>Other Upstream (Working From Home Emissions)</i>	Not material
Leased Assets	Oaklin’s leased office is covered in Scope 2.
<b>Total Emissions</b>	<b>352.58</b>

## Current Emissions Reporting

<b>Current Year: 1st April 2021 – 31st March 2022</b>	
<b>Additional Details relating to the Current Emissions calculations.</b>	
Our carbon emissions are calculated using average data approached as described in the GHG Protocol and input from carbonfootprint.com.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>Nil</b> (Oaklin do not produce any emissions directly)
<i>Fuel Combustion</i>	-
<i>Vehicle Fleet</i>	-
<b>Scope 2</b>	<b>145.60</b>
<i>Purchased Electricity</i>	145.60
<i>Steam, Heating and Cooling</i>	Building heating emissions covered above in Purchased Electricity.
<b>Scope 3 (Included Sources)</b>	<b>69.4</b>
<i>Purchased Goods and Services</i>	Not material
<i>Capital Goods</i>	Not relevant – Oaklin do not have any capital goods.
<i>Fuel and Energy Related Activities</i>	Not relevant – Oaklin fuel and energy is covered in Scope 2
<i>Transportation and Distribution of Products</i>	Not relevant – Oaklin do not produce, sell or transport any products.

<i>(Upstream and Downstream)</i>	
<i>Waste Generated in Operation</i>	Not material
<i>Business Travel</i>	63.82
Employee Commuting	5.58
<i>Other Upstream (Working From Home Emissions)</i>	10.03
Leased Assets	Oaklin's leased office is covered in Scope 2.
<b>Total Emissions</b>	<b>225.03</b>

### Emissions reduction targets

We have an ambitious growth agenda for the business and we remain committed to growing in a sustainable way. As a professional services firm, the biggest impact we can have is through the consulting work we do, where we can support our clients who are directly contributing to delivering the energy transition and a sustainable global economy.

By comparison, our own internal operations have a much smaller impact on the world, but an impact we are equally committed to reducing. We will:

- Continue to offset all our emissions with a certified and reputable scheme, as we have done each year since 2015.
- Aim to reduce our emissions per FTE as our business grows

We are currently in the process of gathering more accurate data about our emissions, updating our targets and verifying these with the Science Based Targets initiative. Our lower emissions figure in the current reporting year reflects reduced business travel and employee commuting, largely a result of the pandemic.

### Carbon Reduction Projects

To achieve these objectives, we have several initiatives that are already underway. The following environmental management measures and projects have been completed or implemented since the 2019 baseline:

- Working with leading renewable energy clients around the world to drive key projects that support the global energy transition and lead the drive towards net zero.
- Partnering with The Word Forest Organisation to sponsor a new, fully certified carbon offset project. Word Forest is a UK based charity that plants trees, builds classrooms and supports women's empowerment groups in rural Kenya. By supporting their project through certification, we will have an offset scheme in which we can have total confidence and that we know will genuinely make a difference, and it will be open to many others to invest in as well. Through our partnership, we provide Word Forest with ongoing pro-bono advisory support, corporate donations and we lead fund raising to accelerate their efforts to drive decarbonisation and sustainability.
- Continuing to enable a hybrid working model, combining working from the office and working from home.
- For new employees, ensuring the default pension plan is focussed on sustainable investments.
- Complying with all relevant environmental legislation and regulations, and with other requirements that affect our area of operation.

In the future we hope to implement further measures to:

- Support even more client organisations in their journey towards achieving environmental sustainability
- Obtain more accurate data about our actual emissions footprint, to minimise the need for estimation and enable better tracking of emissions reduction initiatives.
- Influence the building owner of our leased office space to continue to source a 100% renewable electricity tariff.
- Engage our supply chain to define minimum standards for emissions and environmental sustainability.
- Actively encourage more sustainable methods of travel, for both employee commuting and business travel.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

***Signed on behalf of the Supplier:***
